Dear Howard,

I am writing to advise you of test results using the Halex Coil on equipment at General Motors Components Plant in St. Catharines, Ontario.

In April of this year two identical machines were selected for a test of the Halex Coil. The coil was placed over a cartridge filter on a recirculating sump system. After three months the oil required changing and both cartridge filters were removed for examination. The one which had the Halex Coil installed was heavily loaded with very fine contaminating particles. The other filter contained very little of this material.

This test was a complete success in showing the capability of the Halex Coil. It proved convincingly that filtration was greatly improved and that the equipment was better protected.

Thank you once again for providing such an exceptional product.

Yours truly,

A handwritten signature in blue ink that reads "B. Howard".

Brian Howard
President

P.S. - I have had a Halex Coil on my 1991 Acura Legend since we met in 1995. This car has traveled 345,000 km and has been well maintained. Recently I had the mandatory emissions testing performed for license renewal. The results were astonishing! One reading was 1/10th of the legal limit. Please see report enclosed.
