

ROADTRIP SD AND SDI LOW PROFILE SATELLITE TV ANTENNAS BY WINEGARD

The Roadtrip SD (stationary) and the Roadtrip SDi (in-motion) are the latest generation of low profile, mobile, satellite television antennas. Just 12-inches high, they are no taller than a roof-top air conditioner which makes negotiating tight, height restrictions a snap. The low profile design also helps to minimize a bulbous protrusion on top of your RV. Plus, these babies look sharp and they're packed with features like a one-button on/off, superior radome to increase signal strength, light weight, space saving, GPS technology (available on the in-motion model only) and superior performance to name a few. Both are available in black or white.

SUGGESTED RETAIL PRICE: ROADTRIP SD (STATIONARY) \$1,399, ROADTRIP SDI (IN-MOTION) \$1,999

RECEIVER HITCH/COVER BY VALLEY INDUSTRIES

Keep dirt and moisture out of your receiver with this new hitch cover. A standard, black cover with the Valley Industries logo is available for 1 1/4- to 2-inch receiver openings. A chrome plated version is also available for two-inch openings only. If you're in the habit of misplacing your receiver cover, breathe easy. Valley has solved this problem with a flexible rubber cover. It slips onto two-inch receivers and stays securely attached at all times. Feelin' flashy? Make a personal statement with a pre-designed, decorative hitch cover that allows you to show the world your style. All decorative covers require a hitch pin or lock to secure them to the hitch.

HALEX COIL BY HALEX

Innovative and new, the Halex Coil is a magnetic oil filter that attaches to the outside of an existing oil filter. It utilizes an extremely high magnetic strength of rare-earth magnets. Sound too scientific? Basically The Halex Coil cleans oil by drawing out contaminants with its strong magnetic field. Truthfully, it's more detailed than that, but what you really need to know is the amazing design of this advanced filtration device really aids in extending the life of your equipment. The Halex Coil will improve efficiency and fuel economy, extend service intervals, reduce soot and the resulting wear and tear, decrease emissions and best of all it's reusable.
