Halex Development - LCC
ATTN: JIM BARRETT

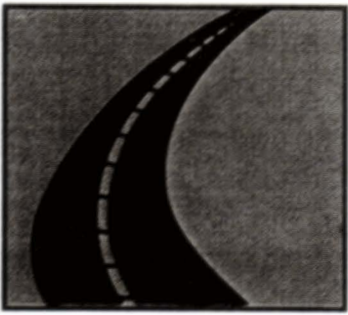

Dear Jim,

Upon completing primary and secondary oil tests with the Halex Magnetic Coil installed, we found iron counts as well as other metals to be reduced by at least 50%. S.U.R. has proceeded to install coils on all oil and hydraulic spin on filters and will continue to do so any new equipment.

Sincerely,

Bill Creteau

Re: Halex Magnetic Coils

Dear Jim:

Since the spring of 1995 when we installed our first set of Halex Magnetic Coils on the spin on filters of our heavy equipment, light duty trucks and machinery, we have been able to determine immediate improvement of our oil and hydraulic systems. Iron and other materials showed 50%+ reductions.

Confident that our fleet is running longer and cleaner, which equates to daily savings, we continue to use original coils as well as newer units as our company grows.

Sincerely,

Bill Creteau
Vice President
