Attention : Howard Prupas

Dear Howard;

Just a short note of thanks for introducing my company to your Halex Coil. We took the time to cut open filters that were magnetized and visually saw more filings contained in them than in the filters that were not magnetized. After I analyzed the oil analysis reports that monitored our test trucks, it became evident that your product effectively trapped wear-metals to a greater degree than I initially thought possible. As I contract out all my maintenance, I feel that in the upcoming years my rental fleet of vans and trucks will experience better economy, relative to my normal maintenance cost.

I have no hesitation in recommending any fleet owner interested in reducing wear-metal contamination, to incorporate the Halex Coil into their maintenance program. I am confident they will not be disappointed. I am using the Halex Coil on all of our truck rental equipment and have also applied it on my personal vehicles. I again wish to thank you for your patience in addressing all of our inquiries and the fine product you are promoting. I wish you success in the future.

Sincerely

JOHN SACCHETTI
